PROFESSIONAL SUMMARY

Web Developer with over 3 years of experience in full-stack web development. Results-driven Computer Engineering graduate with professional experience at CyTech International, Inc., and as a Freelance Developer. Skilled in React, Next.js, Django, and Celery, with expertise in creating dynamic user interfaces using Tailwind CSS and Material UI. Experienced in managing real-time data pipelines, asynchronous task processing, and messaging systems using Kafka.

WORK EXPERIENCE

Cytech International, Inc. | *Web Developer* (March 2025 – April 2026)

- Developed Information Security Pressure Analysis (ISPA) – An Assessment analysis about Security status of an Organization.
- Added feature in backend about Network scanning feature that monitoring network scans and vulnerabilities.
- Integrated REST APIs and backend services for dynamic handling of scan results, user reports, and dashboards
- Implemented real-time data streaming with Kafka to track network activity and generate immediate alerts for vulnerable endpoints
- Collaborated with cyber security analysts and cross-functional teams to design scalable, secure, and maintainable applications
- Ensured proper handling of sensitive data and implemented security best practices in line with industry standards
- Implemented Celery, Redis, and Kafka for asynchronous and event-driven processing.

Freelance | *Full stack Web Developer* (March 2020 – August 2023)

- Design, develop, and maintain web applications using React, Next.js, Django, Flask, and Python
- Build responsive and dynamic user interfaces with Tailwind CSS, Material UI, and modern JavaScript frameworks
- Implement backend services and RESTful APIs with PostgreSQL and Django REST Framework for efficient data handling
- Develop and optimize landing pages, dashboards, and software solutions for seamless user experience

- Conduct thorough software testing and quality assurance to ensure reliability, performance, and security
- Write clear technical documentation and collaborate with cross-functional teams to deliver scalable and maintainable applications

GlobalChips Technologies CDO, Inc. | *IT Intern April 2015 – May 2015*

- Assisted in the assembly and hardware repair of desktop and laptop systems.
- Managed Operating System installations and software configuration for client machines.
- Gained hands-on experience in hardware diagnostics and technical troubleshooting.

KEY PROJECTS

Android Budget Management Application

- Developed a mobile android application for personal finance tracking using Flutter.
- Implemented Firebase backend for real-time data synchronization, enabling seamless expense tracking across multiple users (shared between devices)
- Currently refining UI/UX and optimizing performance for deployment.

Personal Portfolio Website

- Developed a responsive portfolio website using Next.js and Material UI.
- Showcases projects, technical skills, and development experience.
- Optimized for performance and cross-device compatibility.
- **Live Demo:** valmores.github.io

Information Security and Steering Committee (CyTech Module)

- Developed a web-based management system for organizing committees and meetings using React (Next.js), Django Ninja, PostgreSQL, and Material UI
- Implemented features to create and manage committee members and assign them to scheduled meetings.
- Built a meeting management module allowing users to create meetings, add participants, and track related activities
- Designed a document management system where users can upload files to a central repository and attach them to specific meetings when needed
- Ensured efficient data handling and structured backend APIs for seamless frontend-backend integration
- Created a responsive and user-friendly interface for improved usability and accessibility
- Create Upload Document feature in backend using AWS Cloud Platform.

Competent Leaders Website

- Designed and developed a responsive website using HTML and CSS
- Created clean, user-friendly layouts and navigation to showcase organizational information
- Focused on visual design, accessibility, and cross-browser compatibility

MiltonStark Website

- Implemented a static website using HTML and CSS to showcase brand content and services
- Focused on layout structuring, typography, and visual hierarchy for clear information delivery
- Optimized page structure for readability and user engagement across devices

---

TECHNICAL SKILLS

Proficient in full-stack web development with React, Next.js, Material UI, Tailwind, Django, Django Ninja, PostgreSQL, MongoDB, Kafka, Celery, Redis, and AWS.
