PROFESSIONAL SUMMARY

Web Developer with 1 year of experience in full-stack web development. Results-driven Computer Engineering graduate with professional experience at CyTech International, Inc. Skilled in React, React Native, Next.js, Firebase, Django, and Celery, with expertise in creating dynamic user interfaces using Tailwind CSS and Material UI. Experienced in managing real-time data pipelines, asynchronous task processing, and messaging systems using Kafka.

WORK EXPERIENCE

CyTech International, Inc. | Fulltime *Web Developer* (March 2025 –July 2025), Part-time (July 2025 – April 2026

- Developed Information Security Pressure Analysis (ISPA) – An Assessment analysis about Security status of an Organization.
- Added feature in backend about Network scanning feature that monitoring network scans and vulnerabilities.
- Integrated REST APIs and backend services for dynamic handling of scan results, user reports, and dashboards
- Implemented real-time data streaming with Kafka to track network activity and generate immediate alerts for vulnerable endpoints
- Collaborated with cyber security analysts and cross-functional teams to design scalable, secure, and maintainable applications
- Ensured proper handling of sensitive data and implemented security best practices in line with industry standards
- Implemented Celery, Redis, and Kafka for asynchronous and event-driven processing.

GlobalChips Technologies CDO, Inc. | *IT Intern* April 2015 – May 2015

- Assisted in the assembly and hardware repair of desktop and laptop systems.
 - Managed Operating System installations and software configuration for client machines.
 - Gained hands-on experience in hardware diagnostics and technical troubleshooting.
-

KEY PROJECTS

Android Budget Management Application v1 and v2

- Developed a mobile android application for personal finance tracking using Flutter for version 1 and React native for version 2.
- Implemented Firebase backend for real-time data synchronization, enabling seamless expense tracking across multiple users (shared between devices)
- Currently refining UI/UX and optimizing performance for deployment.

Personal Portfolio Website

- Developed a responsive portfolio website using Next.js and Material UI.
- Showcases projects, technical skills, and development experience.
- Optimized for performance and cross-device compatibility.
- **Live Demo:** valmores.github.io

Information Security and Steering Committee (CyTech Module)

- Developed a web-based management system for organizing committees and meetings using React (Next.js), Django Ninja, PostgreSQL, and Material UI
- Implemented features to create and manage committee members and assign them to scheduled meetings.
- Built a meeting management module allowing users to create meetings, add participants, and track related activities
- Designed a document management system where users can upload files to a central repository and attach them to specific meetings when needed
- Ensured efficient data handling and structured backend APIs for seamless frontend-backend integration
- Created a responsive and user-friendly interface for improved usability and accessibility
- Create Upload Document feature in backend using AWS Cloud Platform.

TECHNICAL SKILLS

Proficient in full-stack web development with React, Next.js, Material UI, Tailwind, Django, Django Ninja, PostgreSQL, MongoDB, Kafka, Celery, Redis, and AWS.
